

# TRUCK MOUNTED GRIPPER

ENABLE FLEXIBLE SERVICE OPTIONS

## VERSATILE TRANSPORT

The Lifting Solutions Truck Mounted Gripper (TMG) is a mobile unit designed to transport and operate a continuous rod gripper. The versatile TMG gripper can pull and run any brand, size or shape of continuous rod working in conjunction with a workover rig or any mobile well service equipment that can hang the gripper over the wellhead. The TMG enables more flexible service options to pull and run continuous rod from the well.

## FEATURES AND BENEFITS

- Equipped with standardized operating console and electronic display rod counter and rate system.
- Self-supported with a 3" annular rod blowout preventer (BOP) rated to 3000 psi, and a hydraulically-activated rod safety clamp with accumulator backup operating systems.
- Designed to transport a service reel on the TMG deck, increasing efficiency when staging multiple jobs.
- Certified, lightweight continuous rod guide designed with quick connect system for rapid set-up and deployment.
- Open faced continuous rod gripper for quick and efficient set up on the well.
- Truck mounted knuckle boom crane used to set the continuous sucker rod gripper over the wellhead.

## APPLICATIONS

- Pulling, running , and fishing rod strings
- Insert pump changes
- Progressing Cavity Pump (PCP) rotor replacement
- Setting gas-lift mandrels
- Running nonelectric wireline tools (e.g. setting plugs, memory tools)

## SPECIFICATIONS

Maximum pull capacity	50,000 lb
Gripper speed	100 ft/min.
Blow out preventer	3" annular rod BOP rating – 3000 psi
Rig-in/rig-out time	15-30 mins
